Harbour security

International regulations for protecting ships and harbours from terrorist attacks (the ISPS code) have existed since 1 July 2004.

Only a few security firms in Denmark have been granted approval by Danish authorities to provide this protection. AS Solution is an authorised provider of these services via our consortium, Dansk Havnesikkerhed ApS.

All guards we assign to harbour protection have received specialised training and meet the requirements concerning special approval and clearing from the Danish coastal authorities.

AS Solution can provide:

- RSO and police-approved guards
- X-ray machines and police-approved operators
- Bomb-sniffing dogs and sweep teams, and the required equipment
- Blockades, barriers, fences, etc.
- Mobile video monitoring
- Mobile command centres
- VHF/UHF radios and other required equipment
- Police-approved divers and the required equipment, boats, etc.
